

# The Cherry Hill Company *presents* LibrarySite™ 2

An affordable, complete, easy to use, open-source solution for library website content management

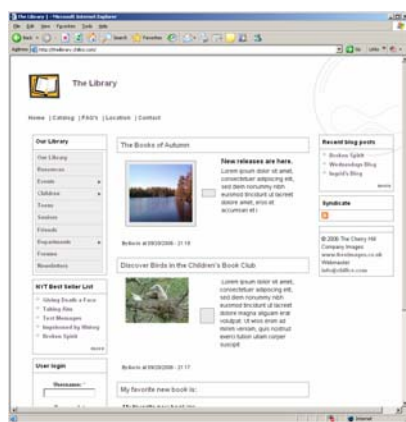

## A Content Management System

Theme based design means one click from this

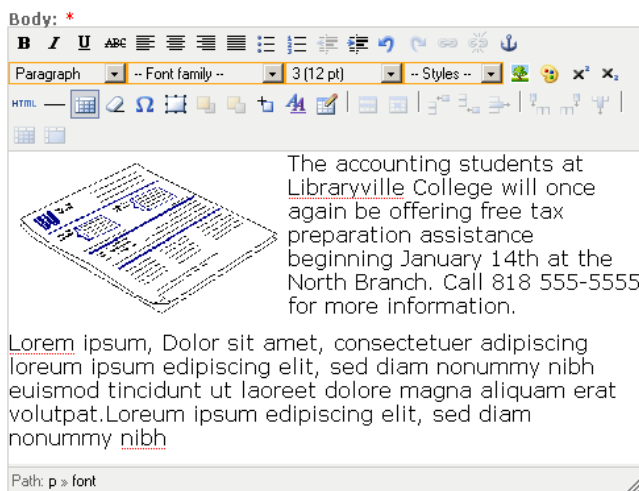

to this

- Content management separates content from presentation
- Enhanced accessibility
- No coding necessary
- Consistent results

- You can select themes from our theme collection modified for library use, choose a theme from over 75 available contributed themes or
- We can create a custom theme, designed to your needs.

The accounting students at Libraryville College will once again be offering free tax preparation assistance beginning January 14th at the North Branch. Call 818 555-5555 for more information.

Lorem ipsum, Dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat. Lorem ipsum adipiscing elit, sed diam nonummy nibh

## In Place Editing

- Our WYSIWYG editor allows you to create and edit content on the page where it lives.
- Our familiar Word-like interface is intuitive and will accept content pasted from word processors.

## Image Insertion

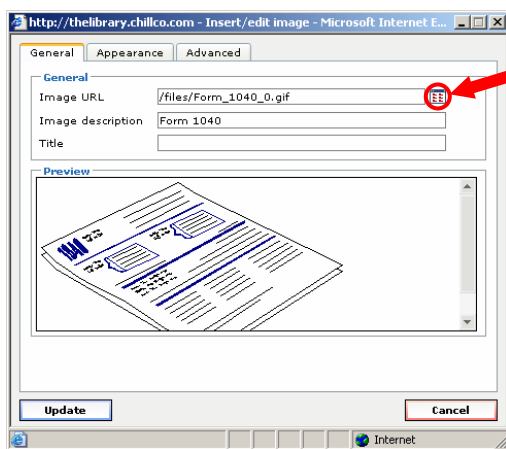

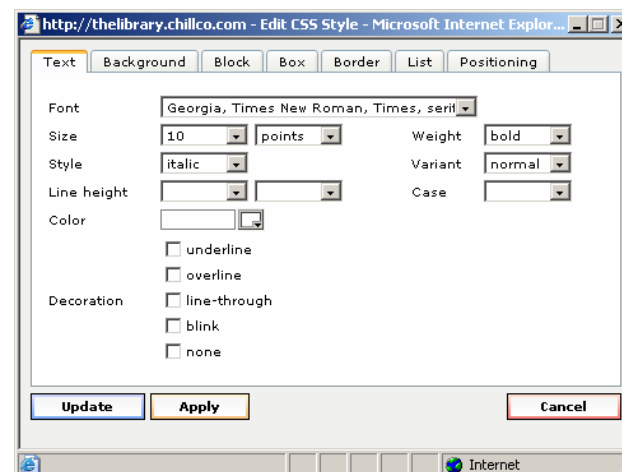

Image picker

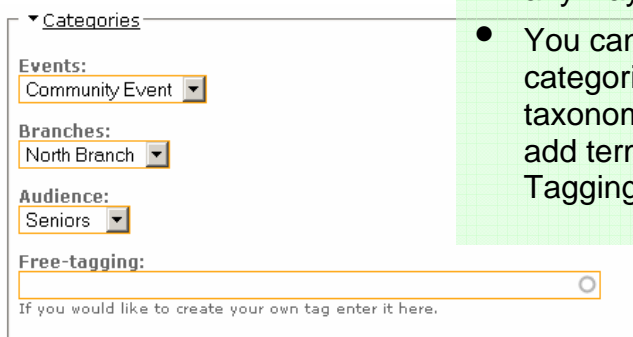

- Insert and format images with the image insert/edit tool.
- This tool gives you control of image alignment and text wrapping.

- Format and position text and objects interactively without giving up the accessibility afforded by CSS.

## CSS Based Formatting

## Taxonomy

- Categorize and classify events any way you want.
- You can set up classes, categories and terms using the taxonomy module or you can add terms on the fly with Free-Tagging.

## RSS

- Several content types can be syndicated with RSS. You can keep your patrons informed without the need to send email.

## What is LibrarySite 2?

- LibrarySite 2 is our package of services to painlessly enable you to create and maintain an attractive and up-to-date Web presence.
- LibrarySite 2 is available for installation on your server (Linux or Windows) or we can host it for you.
- LibrarySite 2 is built on free, open-source software including Drupal, MySQL and PHP.

### Extensible Structure

- Built with a modular structure on PHP and MySQL, LibrarySite can be extended to create custom functionality.
- Library systems including catalogs and databases can be integrated into the site.
- In the spirit of open-source, custom code we create will be released under GNU GPL.

### Support & Training

- Full documentation online.
- Online support forums
- Unlimited email support.
- Live training delivered online via GoToMeeting or Acrobat Connect.
- Phone support and onsite training are available on an as-needed or contract basis.
